The HSI conference is a platform for exchanging ideas, knowledge, skills and experiences in interactions between man and systems. It has become a major international conference in the field of Human System Interaction. The success of previous editions (e.g. in Melbourne 2022, Gdańsk 2021, Tokyo 2020, Richmond 2019) reflects how wide is the interest of researchers worldwide on these topics. This 16th International Conference on Human System Interaction will be held in **Paris from the 8th to 11th July 2024**. Several previous HSI editions were indexed by Scopus and Web of Science, with proceedings published in IEEE Xplore. The conference will cover the theory, design and application of human-system interaction in the areas of science, education, business, industry, services, humanity, environment, health, and government. Aside from the regular presentations, the conference will include keynote addresses from renowned speakers, and expects to attract more than 150 participants from both academia and industry.

16th International Conference on
Human System Interaction
Paris, 8-11 July 2024

Workshops, Tutorials, and Special Sessions

HSI 2024 will include Workshops, Tutorials, and Special Sessions on specialized topic areas reporting technical trends and breakthroughs in human-system interaction. Please submit proposals by 31.01.2024 (more: **http://hsi2024.welcometohsi.org/special-sessions**).

SCOPE OF THE CONFERENCE

- Interacting with AI
- Artificial Intelligence and Deep Learning
- Generative AI & Foundation Models
- Human Machine Interaction
- Autonomous Cars and Vehicles
- Cyber Security in HSI
- Robots and HSI in Robotics
- Sociological and Psychological aspects of HSI
- Cyber Physical Systems
- Human Space Computing
- Internet of Things and Smart Homes
- Health Care and Assistive Devices
- Extreme Interfaces
- Humanity in Wireless Mesh Network
- IOT, Wearable Devices, Networks and Systems
- Vehicular System and Assisted Driving
- Multimedia Human Communication
- Personal Communication System
- Personal Mobile Ad-hoc System
- Network Control and Management
- Security, Privacy and Trust
- Human Dependable System
- Multi-agent System and Applications
- Education and Training
- Student Forum
- Industry Experience Reports
